gage to put our Robing at the containing good leading, old shingles, tar and gravel, tin, sinc, copper, or from roofs — it making no difference how steep or flat they may be—for seven dollars per one hundred square feet; it being far cheaper than any Roof of the old style, and we are sure it will give better satisfaction.

It will also be found to be the best thing ever invented to cover or mend old leaky tin, tar and gravel roofs, or around chimneys, scuttles, dormar windows, and gutters, where the tin is rusted through. This Cement can be put on to last as long as stone, and form a perfect adhesion to any object to which it is applied. Tin Roofs can be painted over (and warranted act to leak) at two deliars and fifty cents per hundred square feet, which is cheaper and much better than paint. This thosling will be found to be the best theng for covering large Roofs where they are exposed to fir—such as Seeam Mills, Saw Mills, Factories, Railroad Cars, Bridges. Depois. Station Houses, Steamboat Decks, and, in fact, every kind of Roof where there is an external exposure from fire. As the Boof is perfect, without a joint will give better satisfaction. exposure from fire. As the Roof is perfect, without a joint in it, it presents no chance for fire to communicate, and any ight substance will burn out without igniting. Insurance Offices at Cincinnati, and other places where Childs & Co.'s Cement has been used, insure Build-

ings with Roofs covered with this Cement, at the same rates as for those covered with Iron, Copper or Tin.

The Cement will be furnished to those at a distance ith directions for using.

EF Orders sent to the undersigned, through the Post office, will be promptly attended to

From J. B. Bennett, General Agent of Æina Ins. Co. for the Southern and Western States. Crscrssarr, Jan. 7, 1857. Having made considerable inquiry as to the merits of the 'Patent Elastic Cement Ecoting," introduced into this city 'Patent Elastic Cement Rooting,' introduced into this city by Childs & Co., I find it to be highly recommended in this city by many excellent judges; that it is meeting with very ready and general introduction; that its superiority over the tar composition Rooting is decided and freely admitted; and finally, I expect to adopt it for my next roof, which will be next summer—having intended to use tin, but will try the virtues of the "Patent Elastic Rooting" as a substitute.
